

## EM 7100 LAMINATE ROLLER

### TAKE THE STRUGGLE OUT OF ROLLING LAMINATE!

- *SAVE TIME AND MONEY WHEN DEALING WITH HEAVY AND BULKY LAMINATE*
- *INCREASES PRODUCTION WHILE REDUCING LABOR COST*

#### Description

The Evans Midwest Model EM7100 Laminate Roller revolutionizes the process of rolling laminate sheets. The machine's innovative design includes features such as a mouth that opens wide for easy loading of laminate sheets and a convenient tape rack that simplifies the wrapping process. This not only saves time but also reduces the physical strain on workers, traditionally associated with manual laminate rolling. The 7100 Laminate Roller goes beyond just rolling laminates; it also assists in taping or tying the roll. An optional tilt takeaway conveyor (model 7110) is available, which further aids in handling by gently lowering heavy rolls to the floor. It's an ideal solution for laminate distribution facilities, where the efficiency of rolling and boxing multiple orders per day is crucial.

#### Technical Specifications

**Electrical:** 110 Volt, 1PH, 60 Hz

**Motor:** 1/2 HP

**Air Requirement:** 80 PSI at .5 CFM

- **Max laminate sheets:** Varies depending on grade, size and weight. 0.6" clamp opening

**Roll Diameter:** 15"

**Max Laminate width::** 62" wide (1.5m)

**Foot Print:** 100" X 46"

**Shipping Weight:** 830 LBS
